➤ Internet Explorer	10
➤ Internet Explorer < 9.....	14
➤ Apple Safari.....	18

Google Chrome

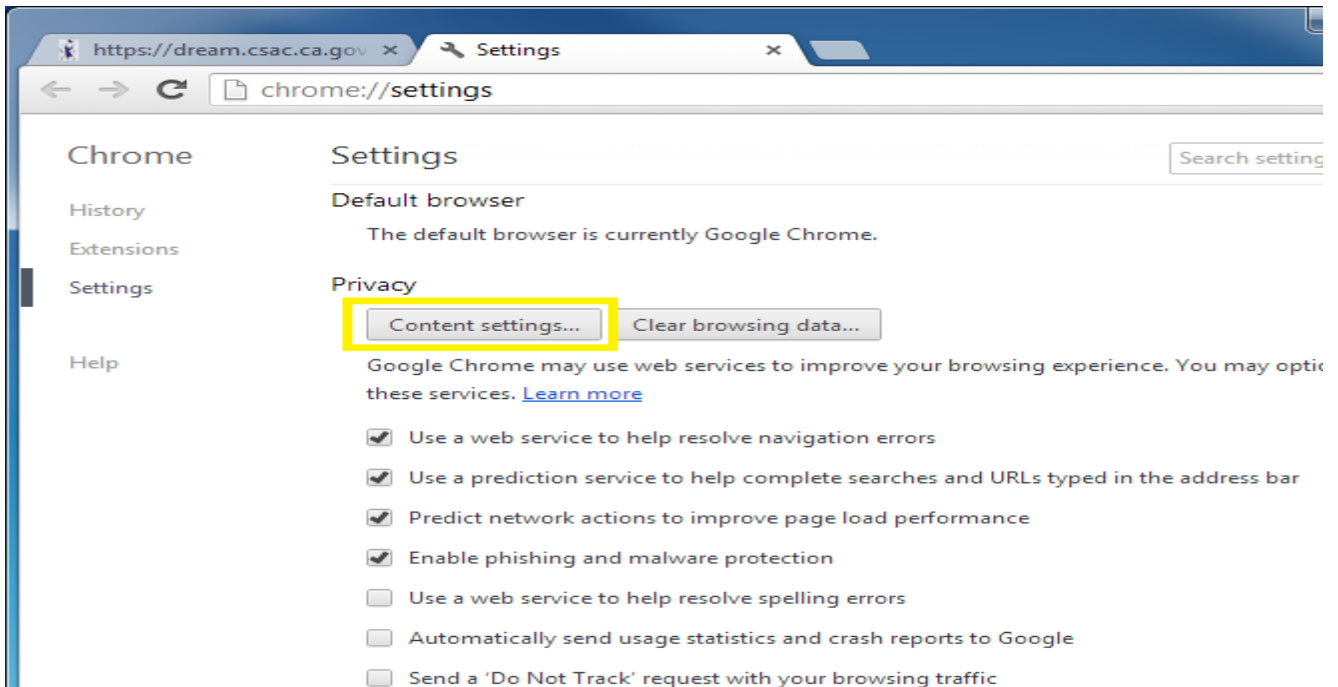

- On the web browser menu click on the "Customize and control Google Chrome" and select "Settings".

- In the "Settings" section click on the "Show advanced settings..."

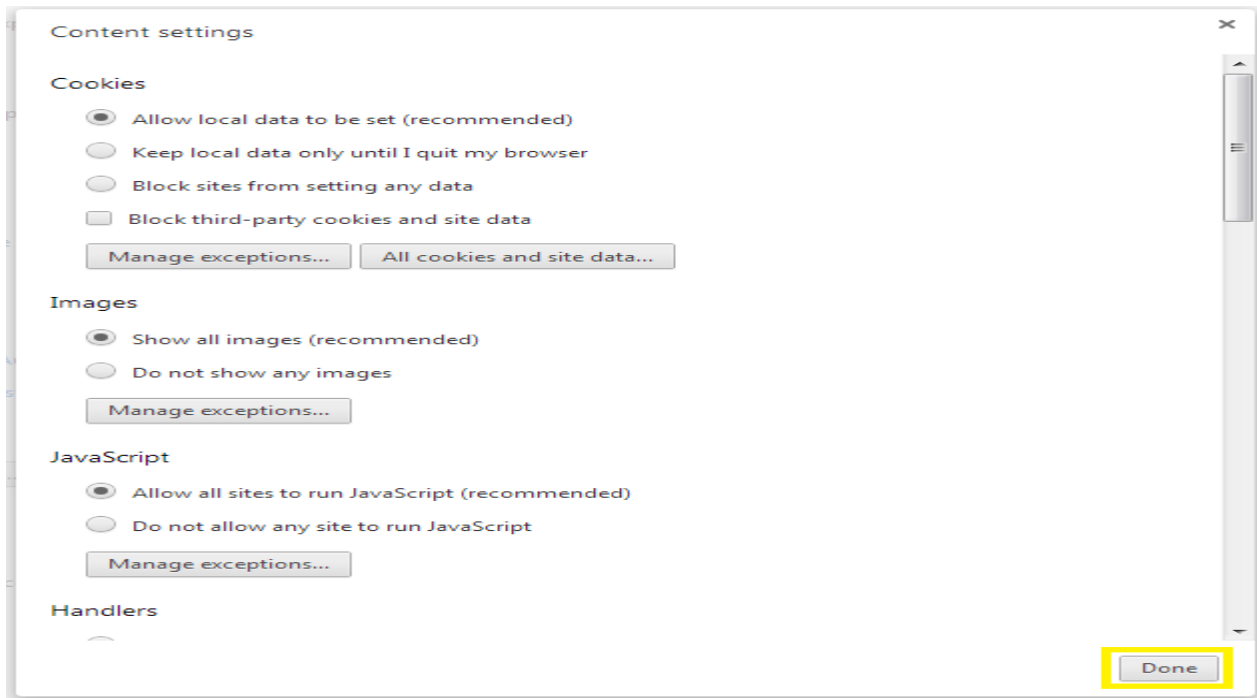

- Under the "Privacy" click on the "Content settings...".

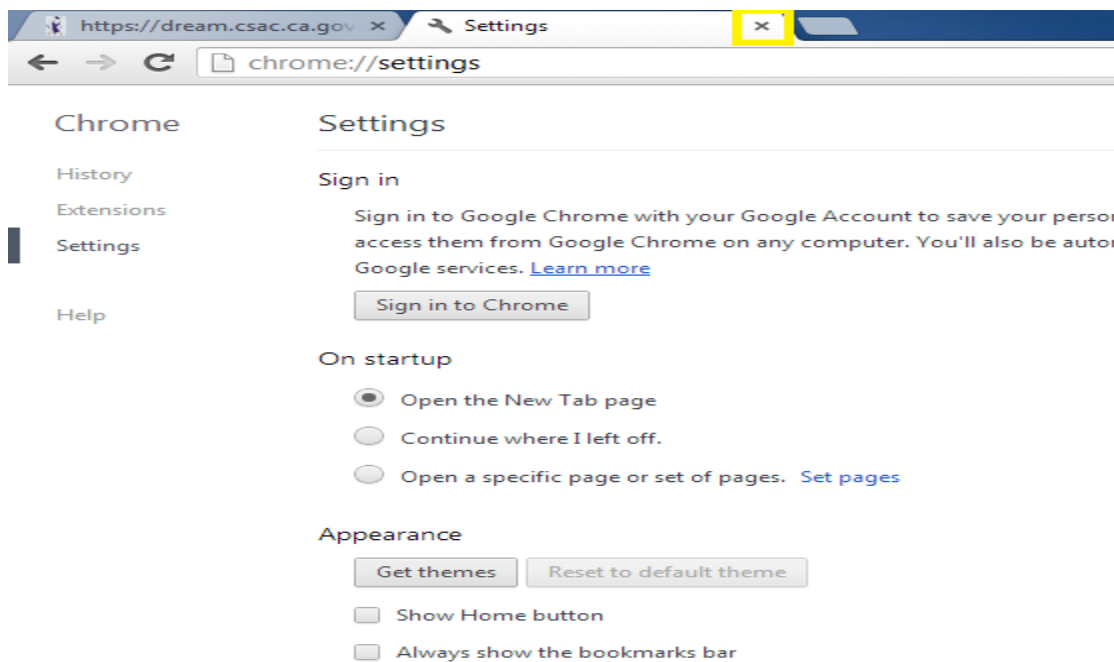

- When the dialog window opens, look for the "JavaScript" section and select "Allow all sites to run JavaScript (recommended)".

- Click on the "Done" button to close it.

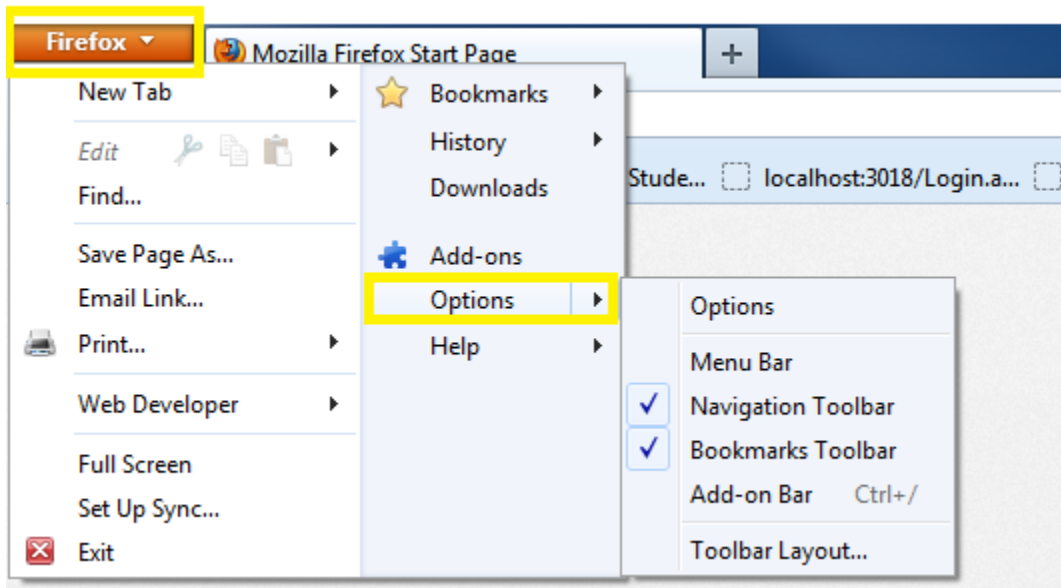

- Close the "Settings" tab.

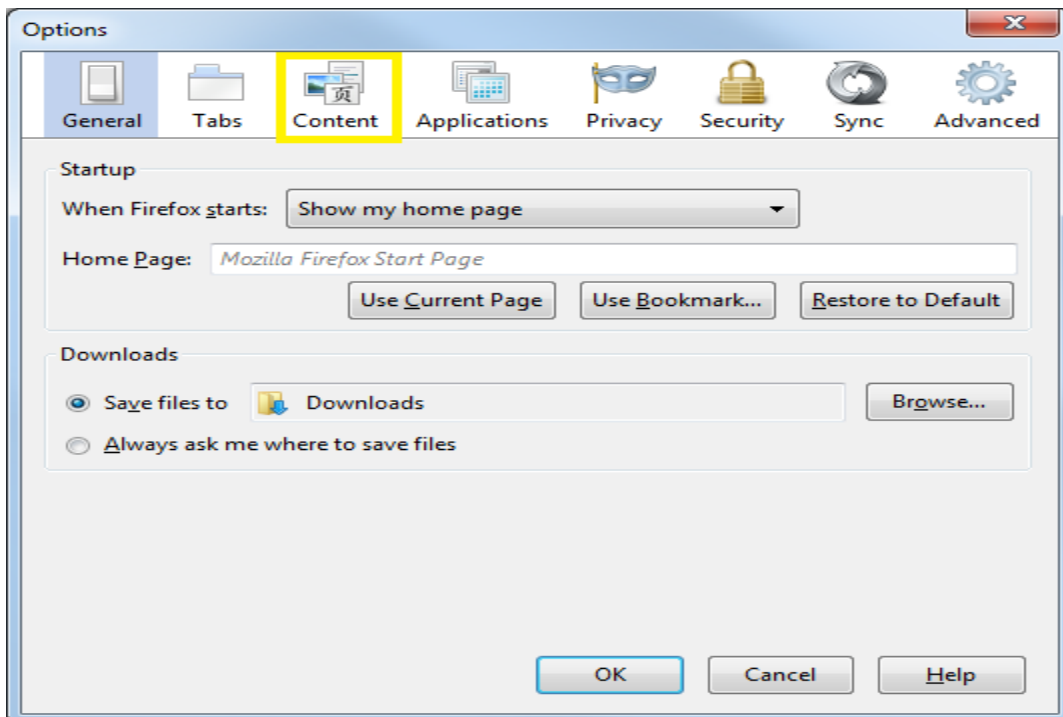

- Close the Browser and Reopen the Page.

Mozilla Firefox

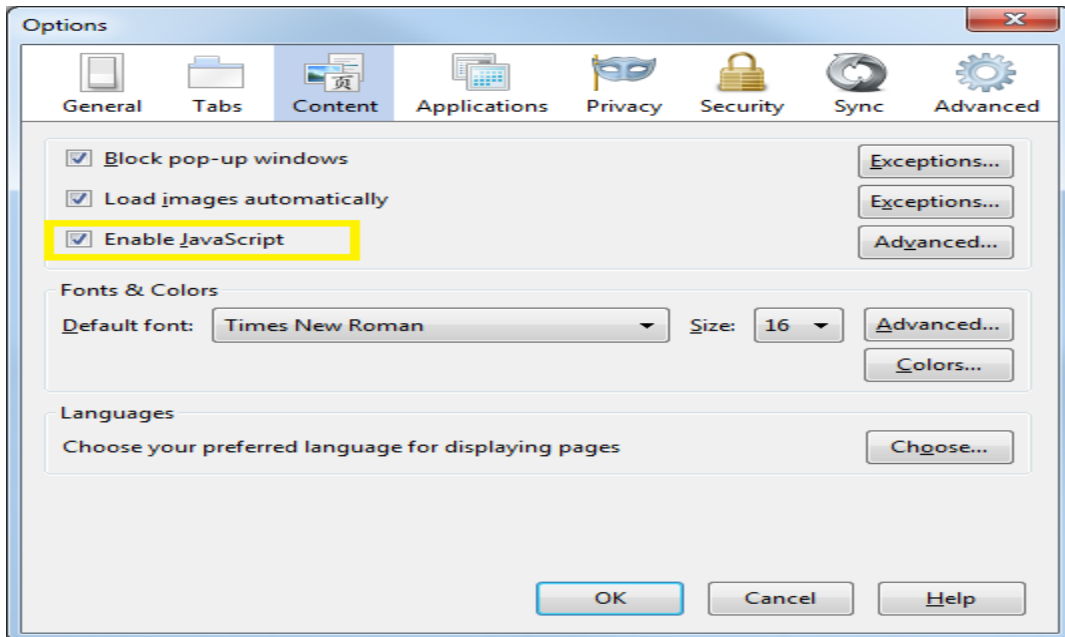

- On the web browser click "Firefox" menu and then select "Options".

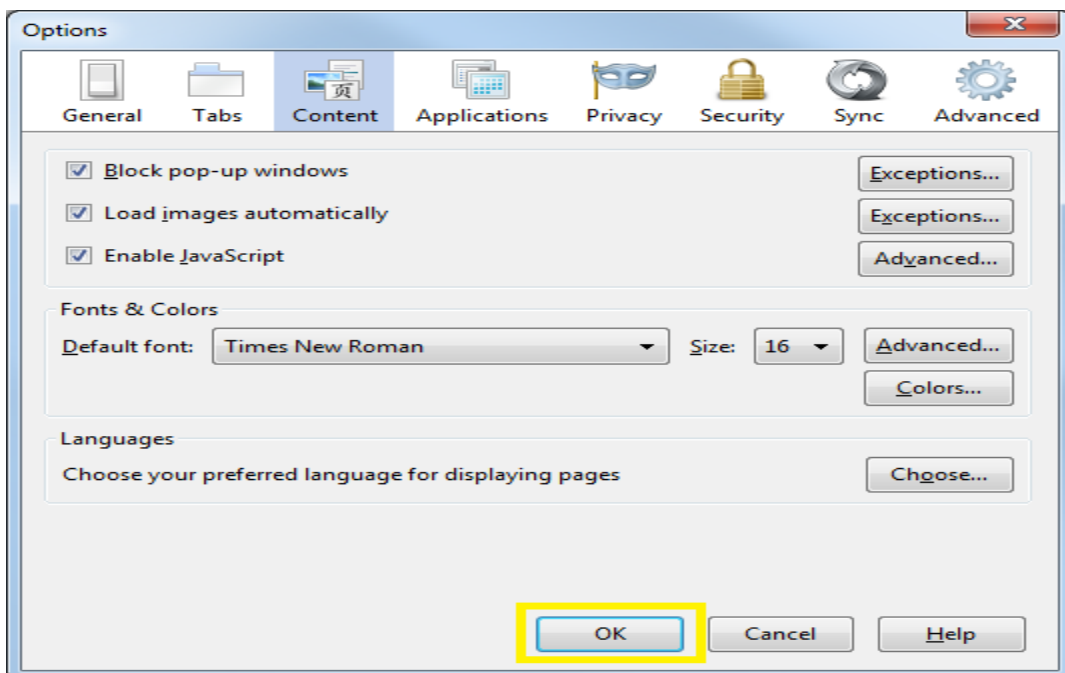

- In the "Options" window select the "Content" tab.

- Mark the "Enable JavaScript" checkbox.

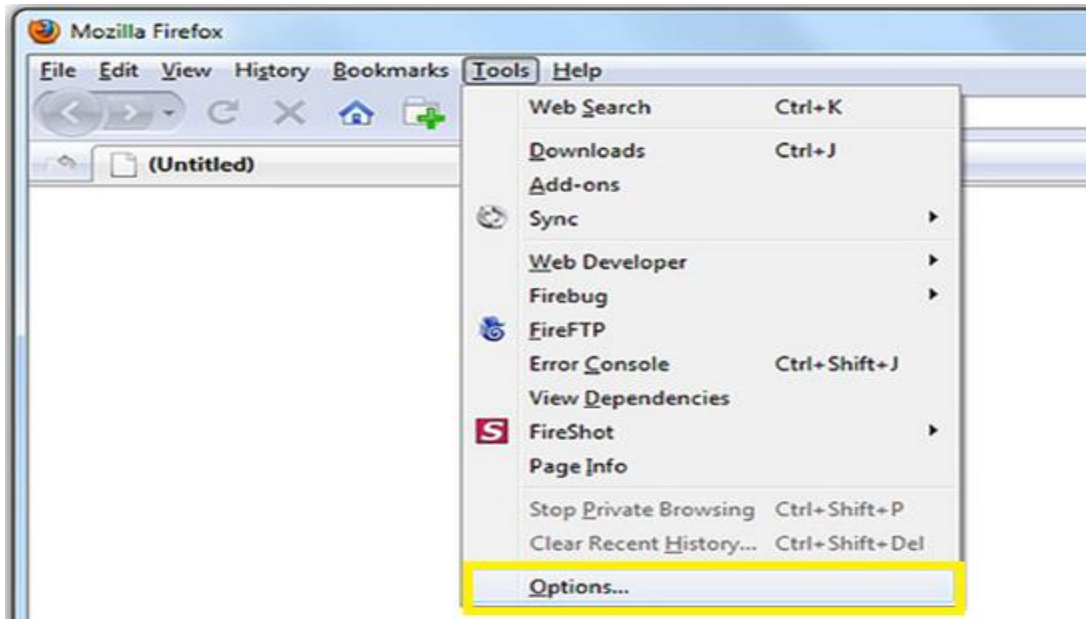

- In the opened "Options" window click on the "OK" button to close it.

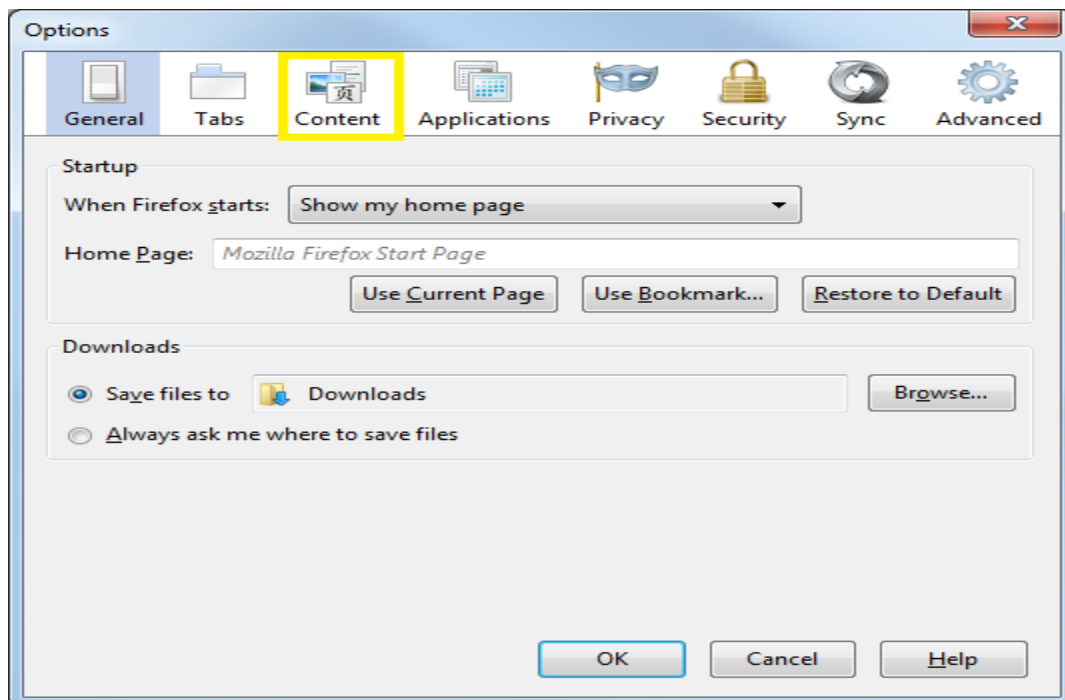

- Close the Browser and Reopen the Page.

 Mozilla Firefox < 4

- On the web browser menu click "Tools" and select "Options".

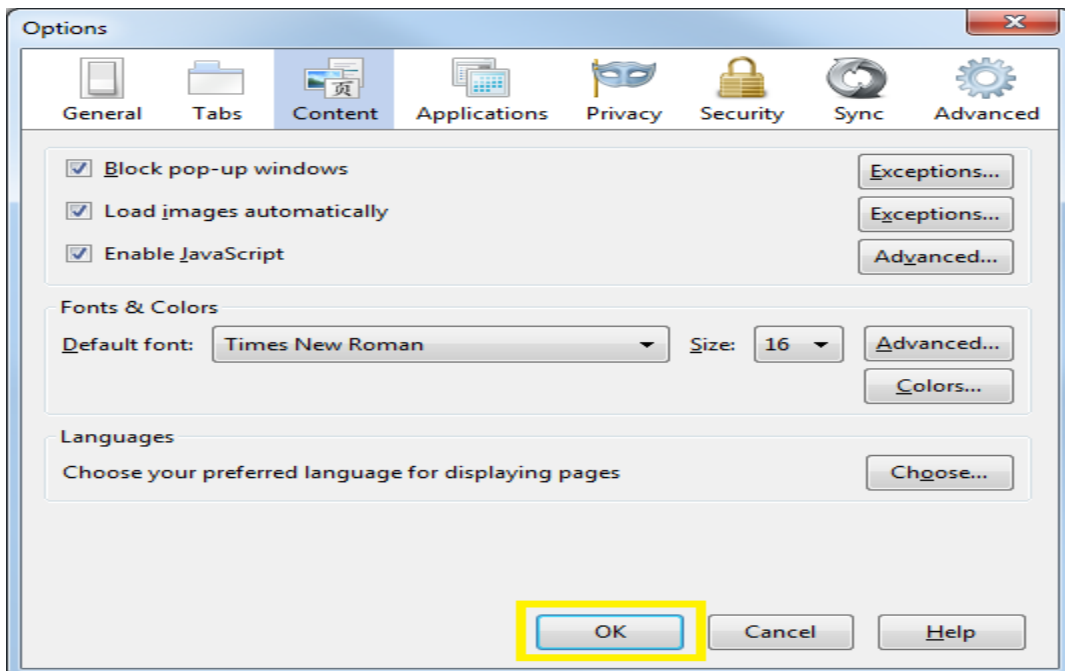

- In the "Options" window select the "Content" tab.

- Mark the "Enable JavaScript" checkbox.

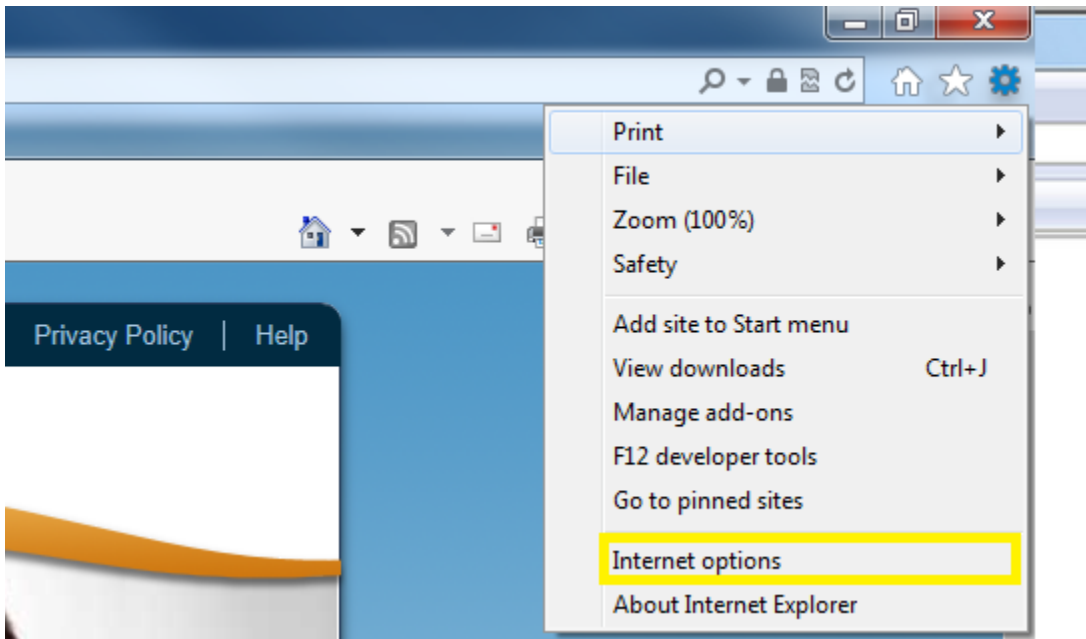

- In the opened "Options" window click on the "OK" button to close it.

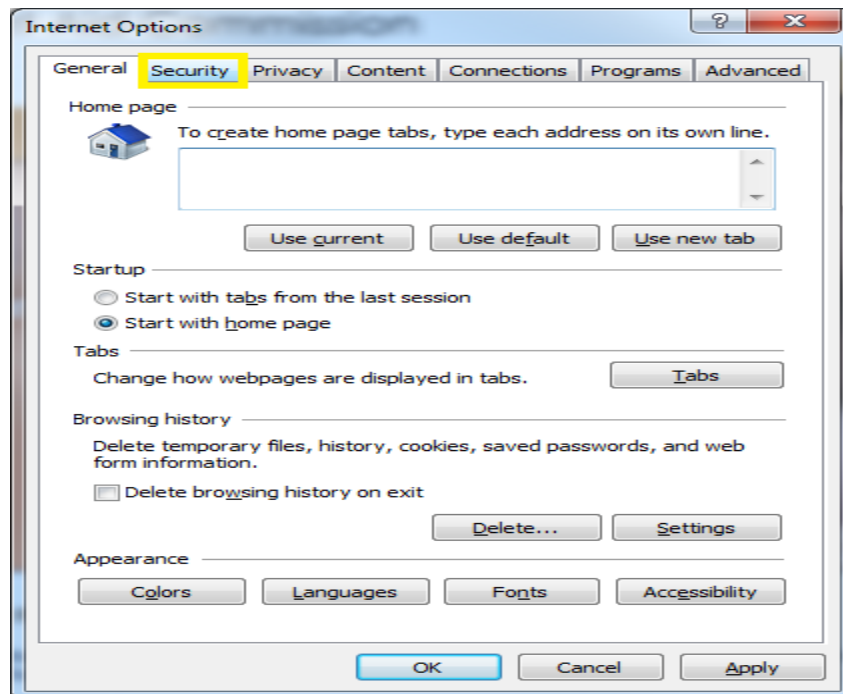

- Close the Browser and Reopen the Page.

Internet Explorer

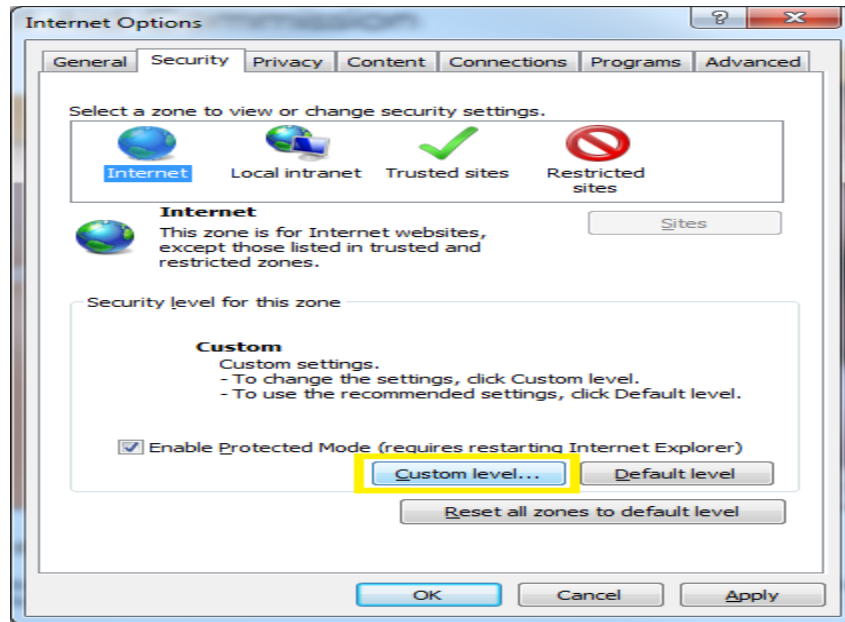

- On web browser menu click "Tools" menu and select "Internet Options".

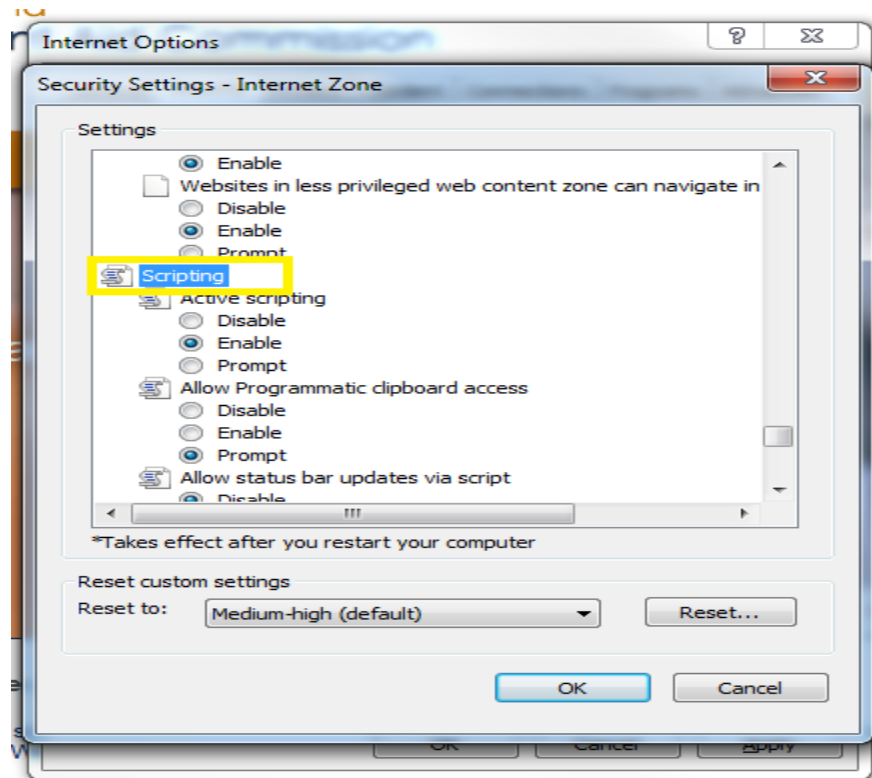

- In the "Internet Options" window select the "Security" tab.

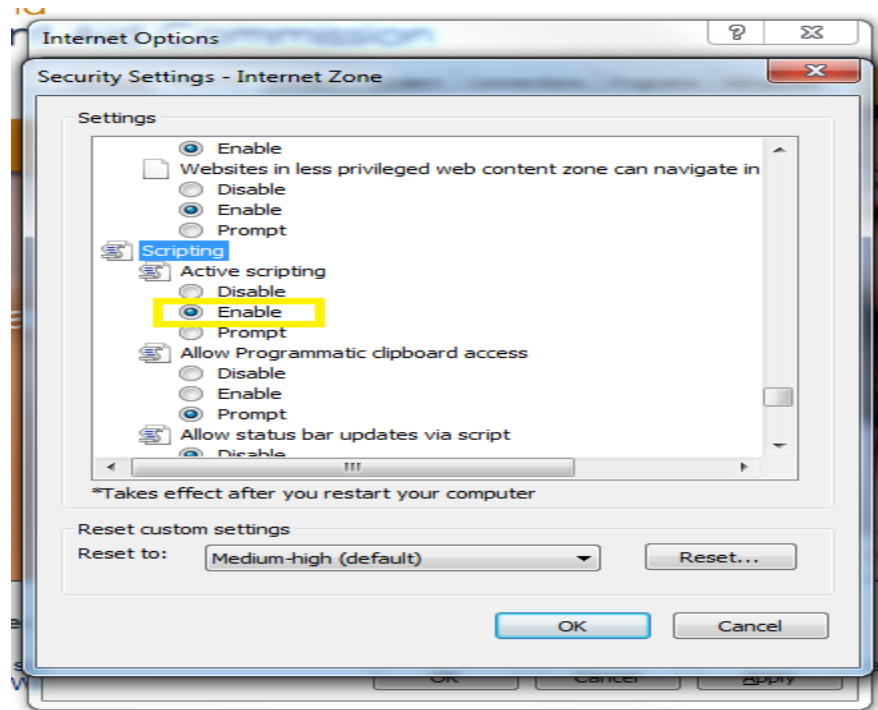

- On the "Security" tab click on the "Custom level..." button.

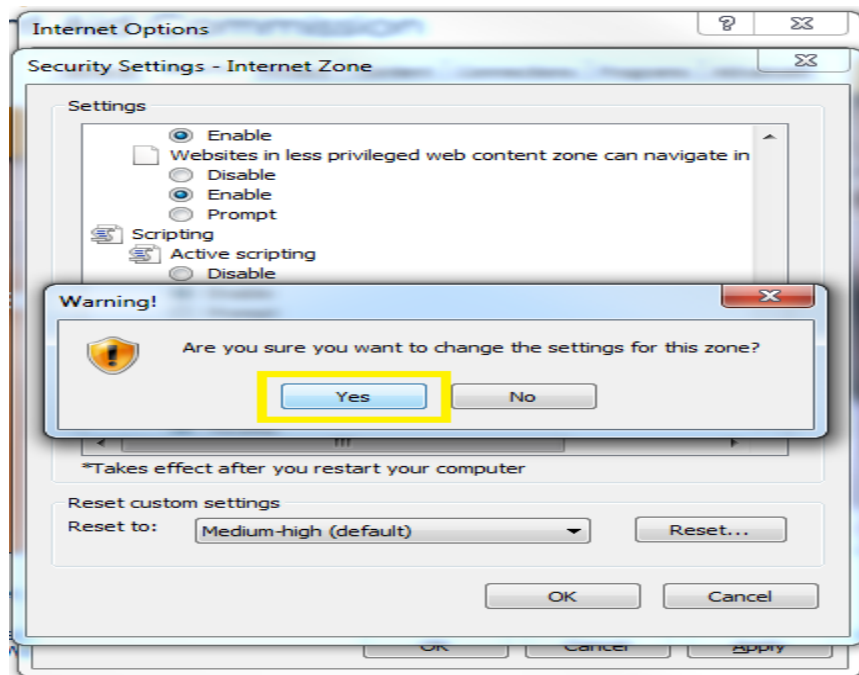

- When the "Security Settings - Internet Zone" dialog window opens, look for the "Scripting" section.

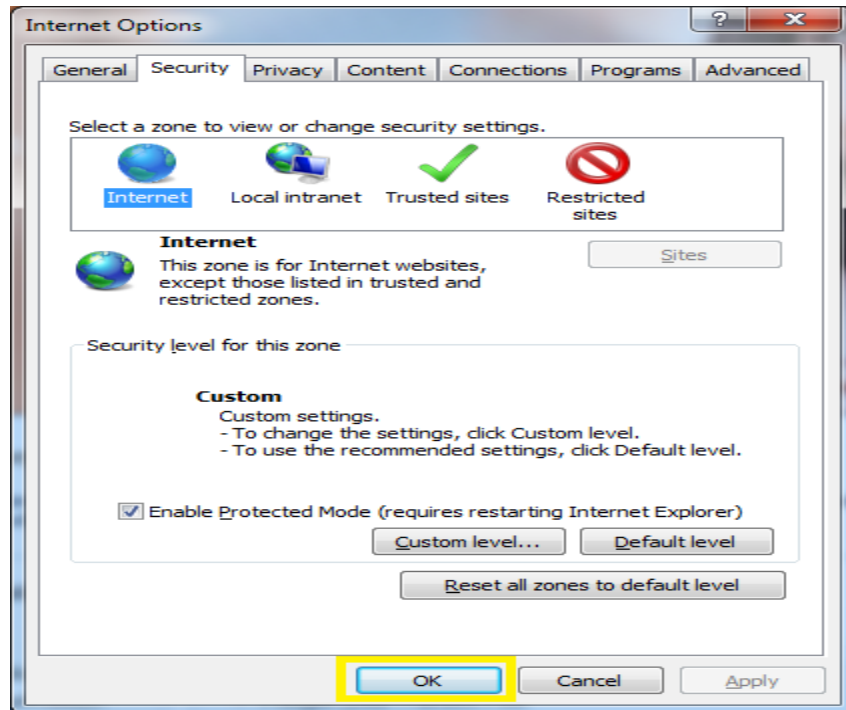

- In the "Active Scripting" item select "Enable".

- When the "Warning!" window pops out asking "Are you sure you want to change the settings for this zone?" select "Yes".

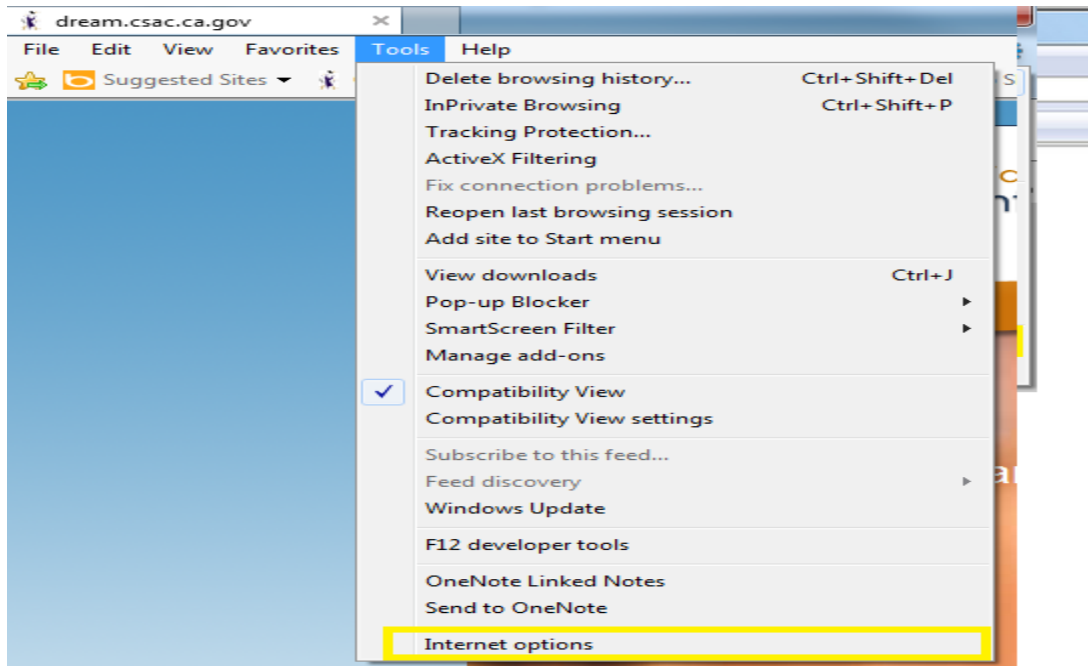

- In the "Internet Options" window click on the "OK" button to close it.

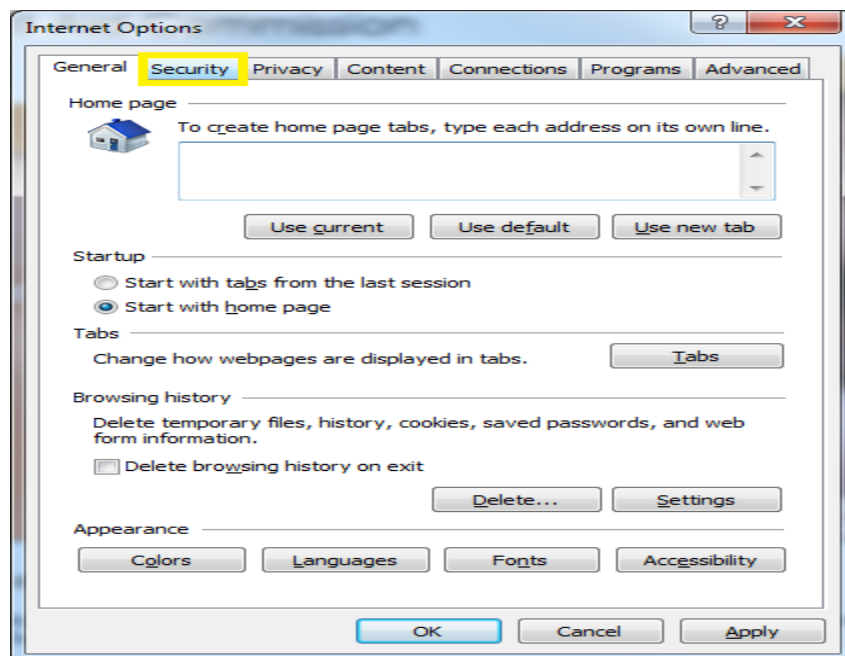

- Close the Browser and Reopen the Page.

Internet Explorer < 9

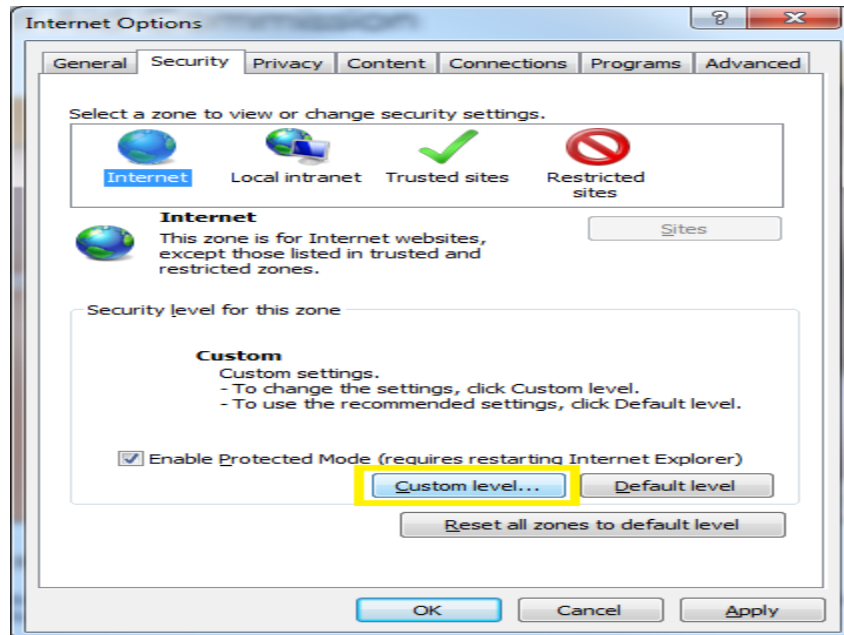

- On web browser menu click "Tools" and select "Internet Options".

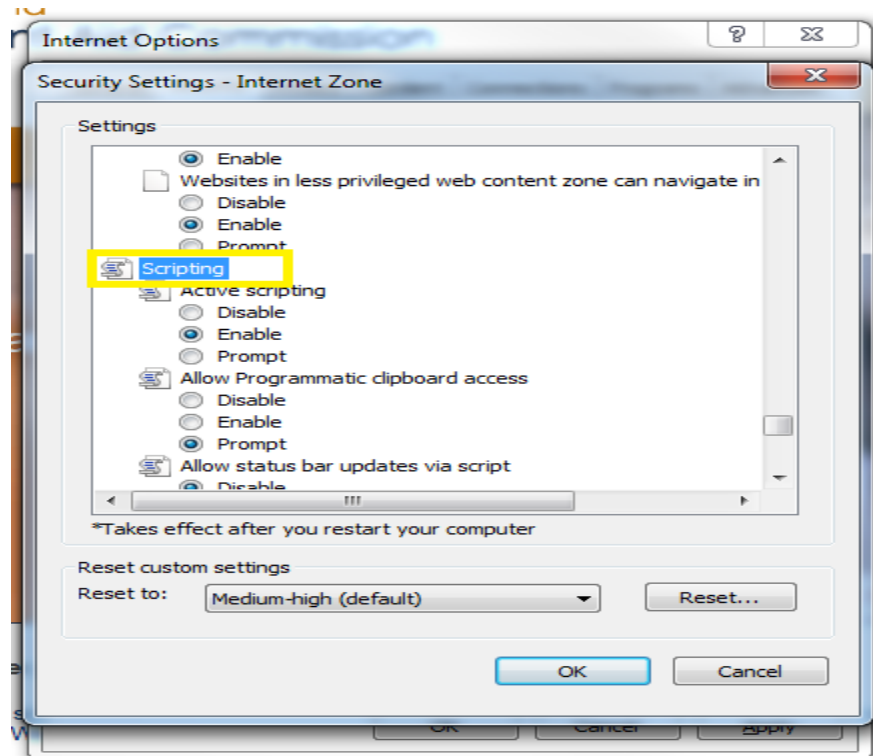

- In the "Internet Options" window select the "Security" tab.

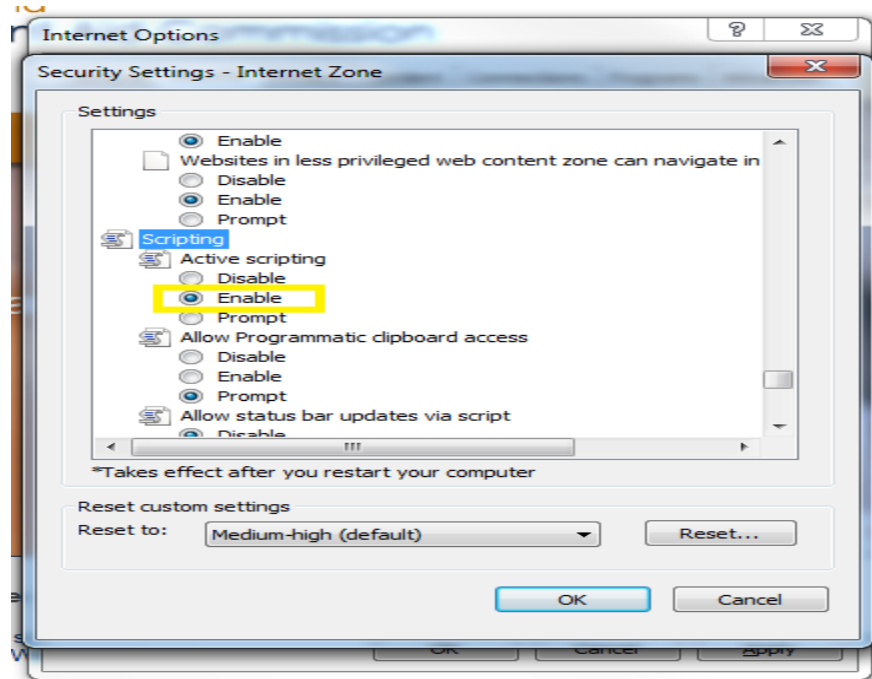

- On the "Security" tab click on the "Custom level..." button.

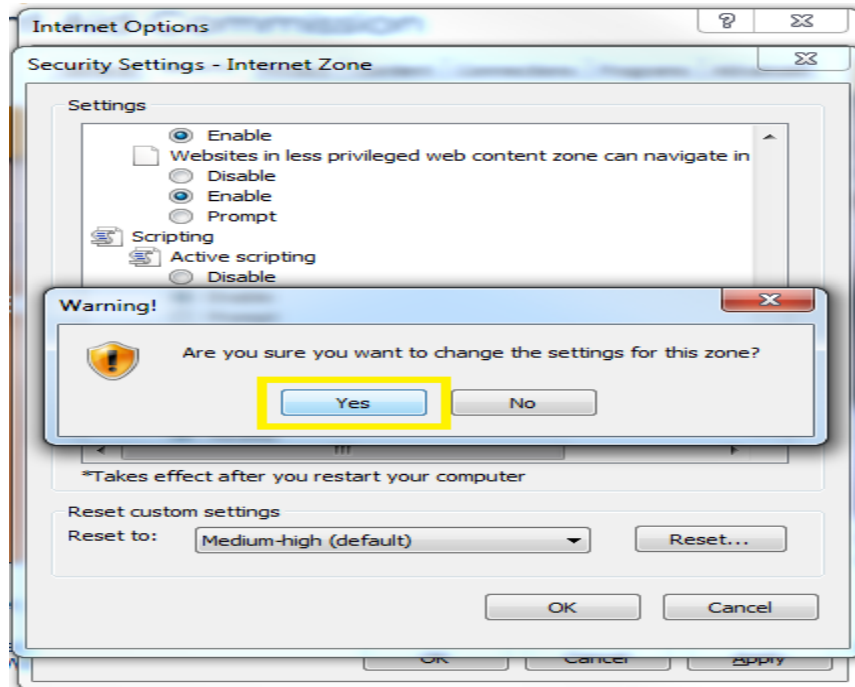

- When the "Security Settings - Internet Zone" dialog window opens, look for the "Scripting" section.

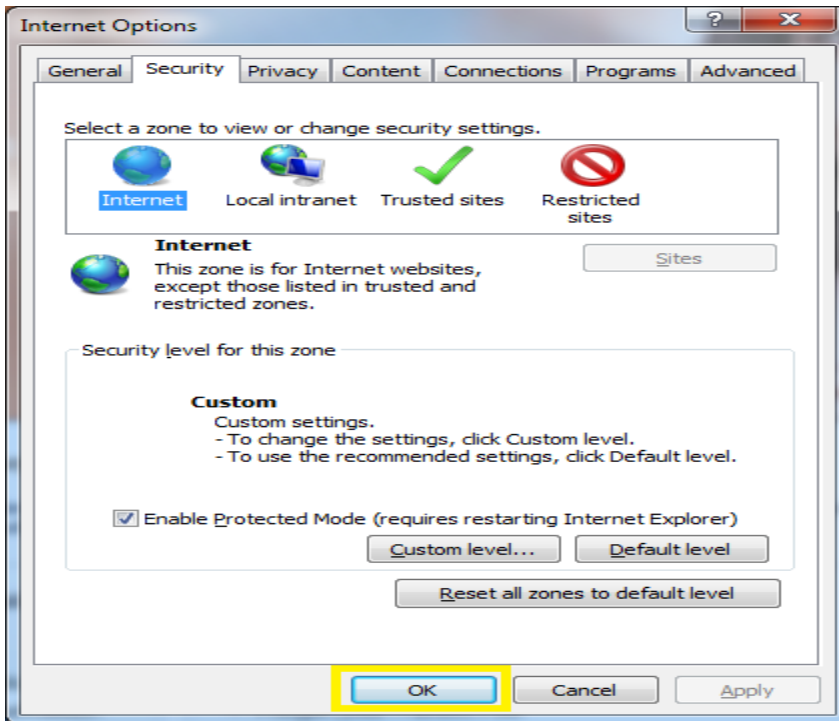

- In the "Active Scripting" item select "Enable".

- When the "Warning!" window pops out asking "Are you sure you want to change the settings for this zone?" select "Yes".

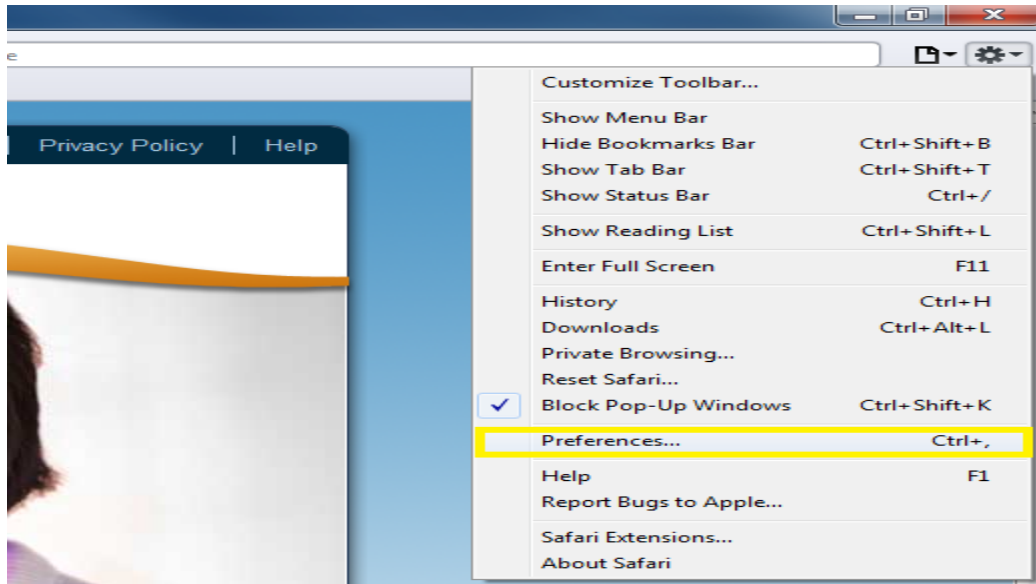

- In the "Internet Options" window click on the "OK" button to close it.

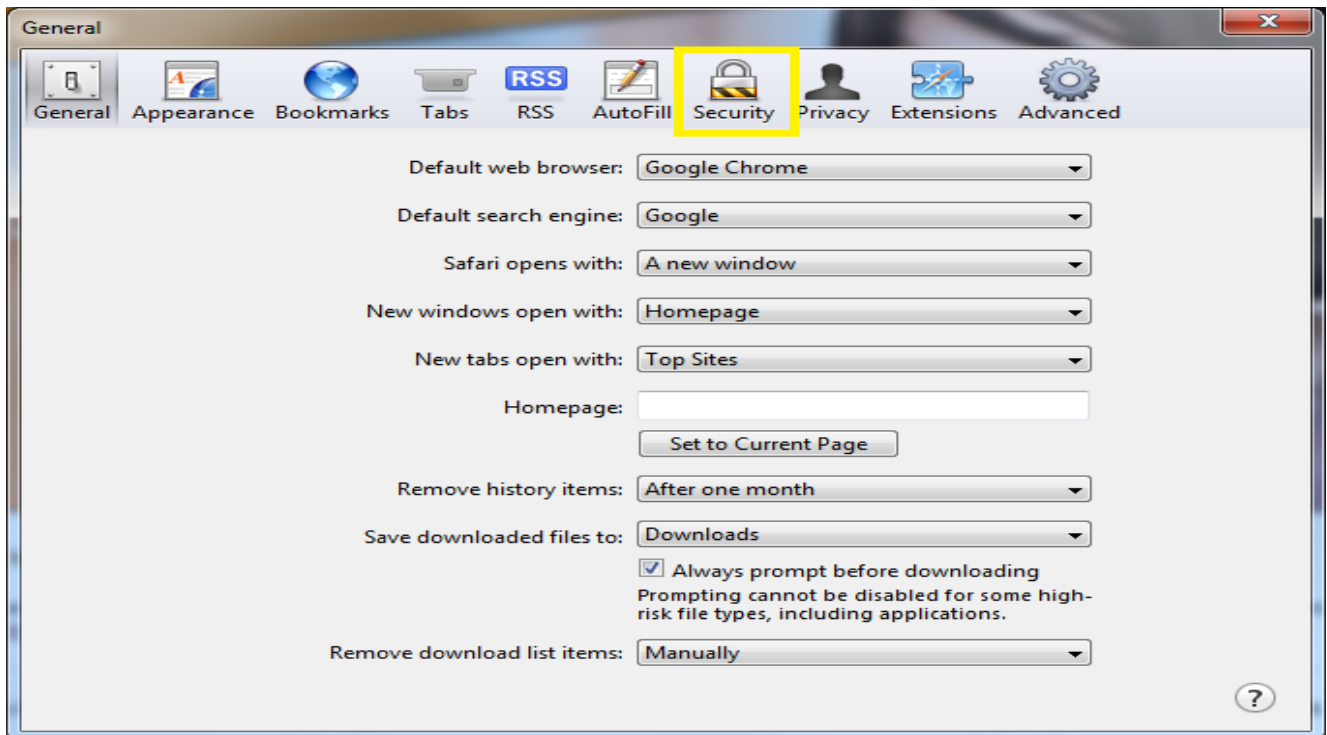

- Close the Browser and Reopen the Page.

Apple Safari

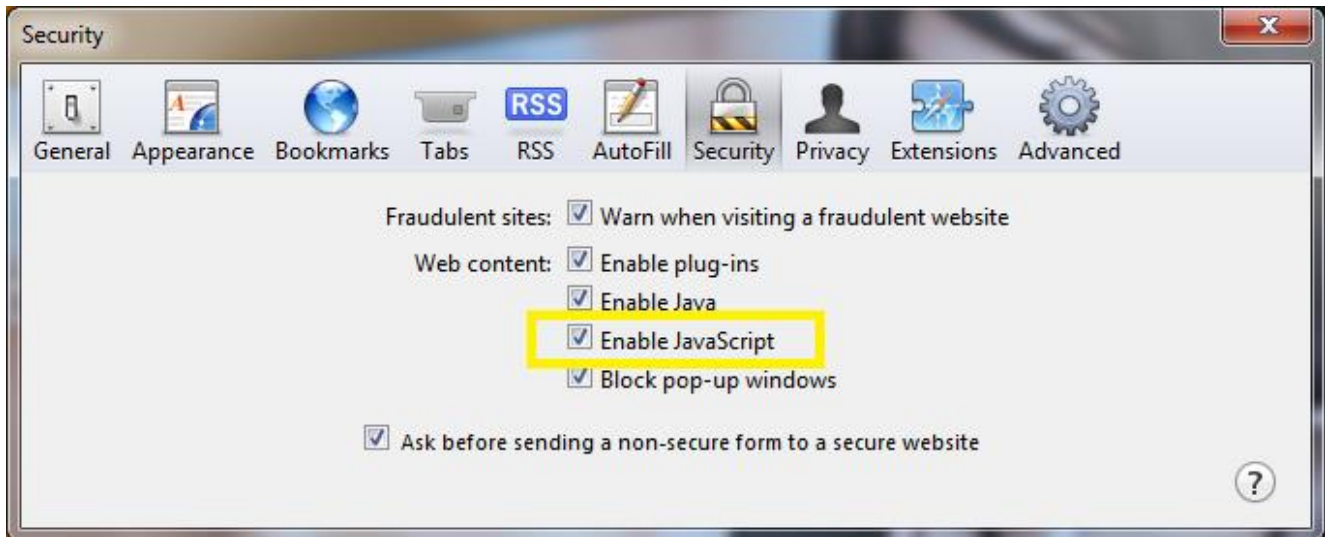

- On the web browser menu click on the "Edit" and select "Preferences".

- In the "Preferences" window select the "Security" tab.

- In the "Security" tab section "Web content" mark the "Enable JavaScript" checkbox.

- Close the Browser and Reopen the Page.
